TECHNOLOGY

At The Legacy, technology is not an add-on. It is built into the experience from the ground up. Every space is designed to support your ideal event execution, allowing events to move effortlessly from presentation to performance, from intimate moments to large-scale programming. Whether the need is clarity, connectivity, or the infrastructure is in place to support it with precision and flexibility.

INTEGRATED AV INFRASTRUCTURE

Built-in audio and visual systems support a wide range of event formats without requiring extensive external setup. Infrastructure is integrated across key spaces to ensure consistency, ease of use, and adaptability.

AUDIO SYSTEMS

High-quality audio is distributed throughout the venue, supporting everything from ambient sound to live performance. Flexible inputs including XLR, HDMI, Bluetooth, and more allow for seamless connection, while audio can be controlled by room or across multiple spaces.

VISUAL & PRESENTATION CAPABILITIES

Projection and screen capabilities support presentations, conferences, and branded content. Select spaces offer retractable screens and video conferencing capabilities, enabling both in-person and hybrid experiences.

STREAMING & CONNECTIVITY

Reliable connectivity supports streaming and hybrid event needs, with Wi-Fi available throughout the venue to keep guests and production teams connected.

POWER & RIGGING

Power is thoughtfully distributed across floors, walls, and columns to support production needs without disrupting the guest experience.

LIGHTING DESIGN

Lighting enhances both atmosphere and functionality, from architectural lighting that highlights the space to programmable lighting that supports the event itself.

LIGHTING CONTROL & ZONING

Lighting zones allow different areas to operate independently or together, supporting transitions throughout the event.

BRANDING & CUSTOMIZATION

Projection and lighting can be used to incorporate branding throughout the venue, creating immersive and customized experiences.

TECHNICAL SUPPORT

Technical support options are available to assist with planning, setup, and execution, ensuring a seamless experience from start to finish.
